

MYKOLAS ROMERIS UNIVERSITY
DOCTORAL CANDIDATES' ASSOCIATION

International Scientific Conference for Young Researchers

**SOCIAL TRANSFORMATIONS
IN CONTEMPORARY SOCIETY
2018**

Abstract book

7-8 June, 2018, Vilnius-Net

Conference is organized by:

Doctoral Candidates'
Association

Conference partners:

MYKOLO ROMERIO
UNIVERSITETAS

Mokslo Lietuva

Editorial board of the issue:

Chairwoman:

Prof. dr. Agota Giedrė Raišienė, Academic Association of Management and Administration, and Mykolas Romeris University, Lithuania

Members:

Dr. Michele Albano, CISTER (Research Centre in Real-Time Computing Systems)
Research Unit, School of Engineering (ISEP) of the Polytechnic Institute of Porto (IPP), Portugal

Prof. dr. Mantas Bileišis, Academic Association of Management and Administration,
General Jonas Žemaitis Military Academy of Lithuania, and Mykolas Romeris University, Lithuania

Dr. Norbert Bozsik, Károly Róbert College, Hungary

Dr. Lynn Clark, The University of Manchester, United Kingdom

Prof. dr. Gediminas Černiauskas, Mykolas Romeris University, Lithuania

Prof. dr. Gintaras Černius, Mykolas Romeris University, Lithuania

Dr. Daiva Daukantaite, Lund University, Sweden

Assoc. prof. dr. Aistė Dromantaitė, AVADA, Mykolas Romeris University, Lithuania

Assoc. prof. dr. Teresa Fayos, University of Valencia, Spain
 Assoc. prof. dr. Stanislav Filip, School of Economics and Management in Public Administration, Slovakia
 Dr. Marc Oliva i Franganillo, University of Barcelona, Spain
 Prof. dr. Ineta Geipele, Riga Technical University, Latvia
 Dr. Ilona Kajokienė, Žemyna clinic, Mykolas Romeris University, Lithuania
 Dr. Marius Laurinaitis, Mykolas Romeris University, Lithuania
 Dr. Tomasz Lewandowski, SWPS University of Social Sciences and Humanities, Faculty in Poznan, Poland
 Prof. dr. Ilídio Tomás Lopes, University of Lisbon, Portugal
 Dr Frédéric Marty, Research group on law, economics, and management, University of Nice Sophia Antipolis, France
 Assoc. prof. dr. Teri McCarthy, Lithuanian University of Educational Sciences, Lithuania
 Dr. Natalija Norvilė, Mykolas Romeris University, Lithuania
 Dr. Jaromír Novák, University of Economics in Bratislava, Slovakia
 Dr. Avelino Oliveira, Centre for Public Administration & Public Policies, Portugal
 Assoc. prof. dr. Bulent Ozel, Istanbul Bilgi University, Turkey
 Dr. Irene Pellizzone, University of Milan, Italy
 Assoc. prof. dr. Paulo Alexandre da Silva Pereira, Mykolas Romeris University, Lithuania
 Assoc. prof. dr. Cristian Pettinari, University of Milan, Italy
 Dr. Andrius Puksas, Mykolas Romeris University, Institute of Lithuanian Scientific Society, Lithuania
 Prof. Dr. Aelita Skaržauskienė, Mykolas Romeris University, Lithuania
 Dr. Katarina Stachova, School of Economics and Management in Public Administration, Slovakia
 Dr. Silvia Svecova, School of Economics and Management in Public Administration, Slovakia
 Dr. Rūta Tamošiūnaitė, Academic Association of Management and Administration, and Mykolas Romeris University, Lithuania
 Dr. Loreta Tauginienė, Mykolas Romeris University, Lithuania
 Assoc. prof. dr. Agnė Tvaronavičienė, Mykolas Romeris University, Lithuania
 Assoc. prof. dr. Aurelija Ulbinaitė, Vilnius University, Lithuania
 Assoc. prof. dr. Akin Savas Yildirim, Istanbul Bilgi University, Turkey

Organizational committee of an International Scientific Conference for Young Researchers “Social Transformations in Contemporary Society 2018”

Chairwoman:

Dalia Karlaite, Mykolas Romeris University, Lithuania

Member:

Mykolas Simas Poškus, Mykolas Romeris University, Lithuania

EXPRESSION OF ENGAGEMENT IN GAMIFIED STUDY SUBJECT

Marius Kalinauskas

Mykolas Romeris university, Lithuania
m.kalinauskas@gmail.com

Abstract

Purpose – To analyze expression forms of engagement during the gamified study subject.

Design/methodology/approach – The qualitative study was being conducted in order to find out how engagement manifests itself among the university students during one semester of gamified study subject. The data were collected during two group interviews and one set of individual interviews. Interviews were conducted after second, third, and fourth month of the semester. Data were analyzed using practical qualitative analysis approach (Bazeley, 2013).

Findings – Study has shown that engagement in gamified study subject manifested itself in long term and short term forms of expression. Data analysis have shown that engagement is expressed in seven forms: behavioral engagement, participation, ardor, flow, emotional engagement, cognitive engagement, and agentic engagement. All these forms of engagement result easy and hard forms of fun.

Research limitations/implications – The results of this study have shown that engagement is context sensitive. Ability to feel engaged is strongly dependent from personal characteristics of a student. Moreover, the external factors like relationships among group members as well as role of an educator might have significant result on student engagement in gamified study subject.

Research results allow to connect two concepts of engagement. In educational sciences engagement is understood as a long term phenomenon while in game studies it is explained as temporal experience. Applying gamification in university study subject allows to explore what temporal features of engagement does transfer to long term engagement. Research results are also significant in trying to find consensus between two competing approaches towards engagement phenomenon in educational sciences and game studies.

Practical implications – By revealing how engagement is being experienced in gamified study subject it is possible to better understand how different gamification

techniques and mechanics lead to motivational outcomes resulting fun. Also, not all forms of engagement might be desirable in educational context. The results of the study allows broader understanding about the functioning of gamification mechanics which could lead to improved gamified systems used for educational purposes.

Originality/Value – The study takes an original approach in exploring expression of engagement in two overlapping disciplines - educational sciences and game studies. There are very few studies which use qualitative methods for deeper understanding of engagement in gamified learning environments.

Keywords: engagement, gamification, gamified study subject, gamified learning environment

Research type: research paper.
